Always back up your world:Before installing a mod it is always a good idea to save your world before you do anything else. This way, if something does not work out and you need to uninstall the mod or require a clean save, you will not lose everything. This is very important and we cannot stress enough how important this step is for most players! Install it correctly:Installing mods is different for each of them because they all have different requirements and rules about what files they will change in Minecraft. For example, some mods will just replace certain files while others will replace a lot more. Make sure to read the mod's description and the developer's website and follow them accordingly. If you trust the mod's description or its developer in general then it is probably safe to install it. If you are unsure at all, it would be a good idea to examine each of your files before installing so that you can see if anything has been altered by this mod.",

On July 14th 2021, developers Facepunch Studios were forced to remove the games "furry" character models after the studio were sent a legal letter from the Australian High Court. Although this issue was later resolved in favor of Facepunch Studios, it highlighted the ongoing issues over intellectual property rights regarding cosmetic character items for online video games. The game has received mixed reviews. Rami Ismail, co-founder of indie game development blog Vlambeer, describes the gameplay of "Rust" as similar to a DayZ-style open world survival game, but says it is "a hundred times better in many ways". He stated that the biggest improvement is in how "Rust" handles players' mood. In DayZ and other games like it, he said that players are constantly forced to make decisions about how they want to spend their time: by killing zombies or by doing a little bit of both. In "Rust", players have a greater degree of control over their consumption of resources; Ismail said that the game's resource system allows players to scavenge for wood, metal and other supplies, allowing them to build items and take care of their daily needs without having to worry about starvation. This, he said, makes camping as a survival mechanic far less useful than it is in DayZ or "Minecraft".",
